Critsila™

Aclonist-500

Injection

Acyclovir IP 500gm.

Key Benefits

Potent Antiviral Activity

Effectively inhibits viral DNA polymerase, reducing viral replication and spread.

Effective Against Herpes Viruses

Active against HSV-1, HSV-2, and Varicella Zoster Virus (VZV) to control infections.

Reduces Disease Severity

Shortens duration of lesions, pain, and viral shedding for faster recovery.

Improves Clinical Outcomes

Supports better patient outcomes and reduces the risk of complications.

Well Tolerated & Safe

Proven safety profile with minimal adverse effects in clinical use.

Indications

Herpes Zoster (Shingles) | Herpes Simplex Infections | Varicella (Chickenpox) | Recurrent Herpes Infections | Immunocompromised Patients
