Critsila™

Aspanez-10000

Injection

Asparaginase I.P. 10000 IU

Potent Anti-Leukemic Activity
Depletes circulating asparagine, inhibiting leukemic cell protein synthesis and survival.

Improved Remission Outcomes
Enhances complete remission rates in ALL with intensive chemotherapy regimens.

Wide Spectrum Efficacy
Active against a broad range of hematological malignancies.

Better Tolerability
Lower immunogenicity with improved safety and minimal adverse effects.

Lyophilized Stability
Lyophilized powder ensures enhanced stability, long shelf life & easy reconstitution.

Trusted Quality
Manufactured under stringent quality standards for reliable patient outcomes.

Indications

- Acute Lymphoblastic Leukemia (ALL)
- Acute Myelogenous Leukemia (AML)
- Lymphoblastic Lymphoma
- Hodgkin's Lymphoma
- Supportive in Combination Chemotherapy
