Cadray™ Lifecare

Botans™-62.5
Tablets

Bosentan Tablets 62.5 mg

Lowers Pulmonary Arterial Pressure
Helps reduce pulmonary vascular resistance and improves exercise capacity.

Endothelin Receptor Antagonist
Selectively blocks endothelin receptors (ET-1) in the pulmonary vasculature.

Improves Cardiac Function
Reduces right ventricular afterload and supports heart function.

Enhances Exercise Tolerance
Increases 6-minute walk distance and physical capacity.

Well Tolerated
Proven safety and tolerability with long-term use.

INDICATIONS

- Pulmonary Arterial Hypertension (PAH)
- Chronic Thromboembolic Pulmonary Hypertension (CTEPH)
- Other Pulmonary Vascular Disorders
