Respihub™

Buditerm™ F Respules

Budesonide & Formoterol Fumarate Respirator Suspension

Dual-Action Airway Support

Budesonide reduces airway inflammation while formoterol provides long-acting bronchodilation.

Anti-Inflammatory Action

Helps control airway inflammation associated with obstructive respiratory conditions.

Long-Acting Bronchodilation

Formoterol helps relax airway smooth muscle for sustained bronchodilator action.

Convenient Nebulization

Respules formulation designed for inhalation via a suitable nebulizer.

Maintenance Respiratory Therapy

Combination inhaled corticosteroid and long-acting bronchodilator therapy for maintenance treatment.

INDICATIONS

- **Asthma**
- **COPD**
- **Maintenance Airway Therapy**
