Information For the Use of
Colostrum (500mg) Capsule

Colofly Capsules

COLOFLY CAPSULES

Colostrum (500 mg)

1. Composition

Each hard gelatin capsule contains:
Bovine Colostrum 500 mg
Excipients q.s.

2. Pharmacological Action

Colostrum is the nutrient-rich first milk produced by mammals after delivery. Bovine colostrum contains **immunoglobulins, lactoferrin, growth factors, peptides and other bioactive nutrients**.

It is used as a nutritional supplement to support **immune function, gastrointestinal health and overall nutritional well-being**.

3. Indications

Colostrum may be used as a nutritional supplement for:

- Supporting **immune system function**.
- Supporting gastrointestinal health and intestinal mucosal integrity.
- Providing naturally occurring immunoglobulins and other bioactive nutrients.
- Supporting nutritional recovery and general wellness.

4. Dosage and Administration

Adults: Typically, one capsule once or twice daily, or as directed by the physician/dietitian.

Swallow the capsule whole with water. It may be taken with or without food, according to the product directions.

Dosage may vary depending on the nutritional requirement and the standardized colostrum content of the formulation.

5. Precautions

- Use with caution in individuals with **milk or dairy-product allergy**.
- Inform the physician if the patient has a history of significant food allergies.

- Use during pregnancy or lactation should be based on medical advice.
- Individuals with lactose intolerance should check the product's excipient profile before use.
- Do not exceed the recommended daily dose unless advised by a healthcare professional.
- Dietary supplements should not be used as a substitute for a balanced diet.

6. Contraindications

Colostrum is contraindicated in individuals with:

- Known hypersensitivity or allergy to **bovine colostrum, milk proteins, or any component of the formulation**.
- Any condition where use is specifically restricted by the treating physician.

7. Adverse Reactions

Colostrum is generally well tolerated when used as directed. Possible adverse effects may include:

- Mild gastrointestinal discomfort
- Nausea
- Bloating or abdominal discomfort
- Loose stools

Allergic reactions may occur in susceptible individuals.

8. Drug Interactions

No major clinically established drug interactions are generally expected with oral bovine colostrum at nutritional doses.

However, patients taking regular prescription medicines or undergoing treatment for chronic conditions should inform their healthcare professional before starting supplementation.

9. Storage

Store in a **cool, dry place**, protected from direct sunlight and moisture.

Keep the container tightly closed.

Keep out of reach of children.

10. Note / Important

Colostrum is a **nutritional supplement** and should not be considered a replacement for specific medical treatment.

The quality and biological activity of colostrum products may vary depending on the source and standardization of immunoglobulin content.

For use under medical supervision.

Keep out of reach of children.
