Cafoli™
LIFECARE

Cyclonip 50 Capsules

Cyclosporine IP 50 mg

Immunosuppressive Action
Reduces immune system activity to prevent organ rejection.

Helps Prevent Organ Rejection
Minimizes immune response against transplanted organs.

Calcineurin Inhibitor
Specifically inhibits calcineurin to block T-cell activation.

Supports Transplant Care
Helps maintain long-term graft function and survival.

Established Therapy
Well studied and widely used in transplant medicine.

INDICATIONS

- **Organ Transplantation**
- **Transplant Rejection Prevention**
- **Specialist-Managed Therapy**
