Information For the Use of
Cyclopentolate (1% w/v) Eye Drops

Cycloop Eye Drop

Cycloop Eye Drops

Composition:

Each mL contains:

- **Cyclopentolate Hydrochloride IP** – 1% w/v

Pharmacological Action:

Cyclopentolate is a **muscarinic anticholinergic agent** used as a cycloplegic and mydriatic.

- **Cycloplegic Action:** Temporarily paralyzes the ciliary muscle, preventing accommodation.
- **Mydriatic Action:** Relaxes the iris sphincter muscle, producing temporary pupil dilation.
- **Diagnostic Action:** Provides adequate cycloplegia for accurate refractive assessment by reducing the influence of accommodation.

Indications:

Cycloop Eye Drops is indicated for:

- **Cycloplegic Refraction**
- **Assessment of Refractive Errors**
- **Pupil Dilation for Ophthalmic Examination**
- **Fundus Examination**
- Other diagnostic ophthalmic procedures requiring temporary mydriasis and cycloplegia

---

Dosage and Administration:

- **Recommended Dose:** Instill **1–2 drops into the affected eye(s)** as directed by the ophthalmologist.
- For cycloplegic refraction, repeat instillation may be required according to the ophthalmologist's examination protocol.
- Wash hands before administration.
- Tilt the head back and gently pull down the lower eyelid.
- Avoid touching the dropper tip to the eye, eyelids, or surrounding surfaces.
- Close the eye gently after instillation.
- Gently press the inner corner of the eye for **1–2 minutes** after administration to reduce systemic absorption.

- Avoid driving or operating machinery until vision returns to normal.

Precautions:

- For **ophthalmic use only**.
- Temporary **blurred vision and photophobia** are expected after administration.
- Use cautiously in **infants, young children, elderly patients**, and patients who may be particularly sensitive to anticholinergic effects.
- Use with
