Critsila™

Composition :-

Cytarabine I.P 200mg/5ml.

Indications

Acute Myeloid Leukemia (AML)	CNS Leukemia	Lymphoblastic Leukemia	Non-Hodgkin Lymphoma	Solid Tumors (Adjunct Therapy)

Cytrim 200 Injection

Cytarabine Injection BP 200mg/5ml

Potent Anticancer Activity

Cytarabine is a pyrimidine analog that inhibits DNA synthesis, effective against rapidly dividing cancer cells.[1]

Indicated for Hematologic Malignancies

Widely used in the treatment of Acute Myeloid Leukemia (AML) and other hematologic cancers.[2]

Multiple Routes of Administration

Suitable for intravenous, intrathecal, and subcutaneous use for flexible treatment approaches.[3]

Proven Clinical Efficacy

Established efficacy in inducing remission and improving survival in various cancer protocols.[4]

Trusted in Oncology Care

A reliable choice for oncologists worldwide as part of standard chemotherapy regimens.[5]
