Critsila™

Dacarfen 100
Injection

Dacarbazine I.P 100mg

Effective Antineoplastic Agent
Dacarbazine is an alkylating agent that interferes with DNA synthesis, inhibiting tumor cell growth and proliferation.[1]

Widely Used in Solid Tumors
Indicated in the treatment of melanoma, Hodgkin lymphoma, and soft tissue sarcomas.[2]

Proven Clinical Efficacy
Demonstrates significant response rates and survival benefits in various malignancies.[3]

Convenient IV Administration
Sterile lyophilized powder for injection ensures optimal stability and ease of preparation.[4]

Trusted in Oncology Practice
Used globally for decades with established safety profile and therapeutic value.[5]

Indications

Malignant Melanoma	Hodgkin Lymphoma	Soft Tissue Sarcoma	Non-Hodgkin Lymphoma	Other Solid Tumors
