Critsila™

Dacarfen 200
Injection

Dacarbazine I.P 200mg

Effective Antineoplastic Agent
Dacarbazine is an alkylating agent that interferes with DNA replication, inhibiting tumor cell growth and division.[1]

Broad Spectrum Activity
Indicated in the treatment of melanoma, Hodgkin lymphoma, and soft tissue sarcomas.[2]

Proven Clinical Efficacy
Demonstrates significant response rates and survival benefits in various malignancies.[3]

Convenient IV Administration
Lyophilized formulation ensures stability and ease of reconstitution for IV use.[4]

Trusted in Oncology Practice
Used globally for decades with an established safety and therapeutic profile.[5]

Indications

Malignant Melanoma	Hodgkin Lymphoma	Soft Tissue Sarcoma	Non-Hodgkin Lymphoma	Other Solid Tumors
