Uropair™
Uro & Nephro Care

Enclomiphene 50mg

Encloten-50

Improves Endogenous Testosterone

Enhances natural testosterone production by stimulating the hypothalamic-pituitary axis[1]

Effective in Male Hypogonadism

Clinically proven to increase testosterone levels in men with secondary hypogonadism[2]

Supports Spermatogenesis

Improves sperm concentration, motility and overall semen parameters[3]

Well Tolerated

Generally well tolerated with minimal adverse effects[4]

Non-Steroidal SERM

Selective estrogen receptor modulator with targeted action[5]

INDICATIONS

- Male Hypogonadism
- Infertility (Male Factor)
- Low Testosterone Levels
- Improves Reproductive Health
- Improves Semen Parameters
