Epihype L

Eperisone Hydrochloride 50mg + Lornoxicam 4mg

Effective Pain Relief

Eperisone and Lornoxicam work synergistically to provide rapid and effective relief from acute musculoskeletal pain.

Anti-Inflammatory Action

Lornoxicam reduces inflammation at the site of pain, improving mobility and comfort.

Muscle Relaxant Effect

Eperisone helps relieve muscle spasm and stiffness, restoring normal movement.

Improves Functional Mobility

Reduces pain and stiffness, helping patients regain daily activity with ease.

Well Tolerated

Balanced combination for effective relief with a favorable safety profile.

INDICATIONS

Acute Musculoskeletal Pain | Low Back Pain | Cervical Spondylosis | Post-operative Pain | Sports Injuries | Muscle Spasm & Stiffness
