Respihub™

Erolone 150
Tablets

Erlotinib Tablets IP 150mg

Indications

- Non-Small Cell Lung Cancer (NSCLC)
- Advanced or Metastatic NSCLC
- EGFR Mutation Positive NSCLC
- Disease Progression After Chemotherapy
- Maintenance Therapy in NSCLC

Targeted Anti-Cancer Action
Erlotinib selectively inhibits EGFR tyrosine kinase, blocking tumor cell growth and proliferation.[1]

Effective in NSCLC
Clinically proven efficacy in advanced or metastatic non-small cell lung cancer (NSCLC).[2]

Improves Progression-Free Survival
Significantly improves progression-free survival and overall response rates.[3]

Well Tolerated
Favorable safety profile with manageable side effects for better patient compliance.[4]

Oral Convenience
Once-daily oral administration ensures ease of use and better patient quality of life.[5]
