ONCOKRIPT™
Oncology Care Medicines

Everloop-5
Tablets

Everolimus I.P 5mg

mTOR Inhibition
Everolimus inhibits mTOR pathway, reducing tumor cell proliferation and growth.[1]

Effective in Multiple Cancers
Indicated in advanced renal cell carcinoma, breast cancer, and neuroendocrine tumors.[2]

Improves Progression-Free Survival
Proven to significantly extend progression-free survival in cancer patients.[3]

Anti-Angiogenic Effect
Reduces tumor angiogenesis by inhibiting VEGF-mediated signaling pathways.[4]

Well Tolerated & Safe
Generally well tolerated with a manageable safety profile for long-term use.[5]

Indications

- Advanced Renal Cell Carcinoma
- Hormone Receptor Positive Breast Cancer
- Pancreatic Neuroendocrine Tumors
- Subependymal Giant Cell Astrocytoma (SEGA)
- Other mTOR Pathway Related Tumors
