Respihub™

# Favitol 200
Tablets

## Favipiravir 200mg

### Broad Spectrum Antiviral Activity
Favipiravir inhibits RNA-dependent RNA polymerase, effectively reducing viral replication.[1]

### Effective in Viral Respiratory Infections
Shown to improve clinical recovery and reduce viral clearance time.[2]

### Reduces Disease Progression
Helps in reducing progression to severe disease and need for mechanical ventilation.[3]

### Improves Recovery Outcomes
Associated with faster symptom resolution and better clinical outcomes.[4]

### Well Tolerated & Safe
Generally well tolerated with a favorable safety profile in clinical use.[5]

## Indications

| | | | | |
|---|---|---|---|---|
| COVID-19 Infection | Viral Pneumonia | Influenza | Other Viral Respiratory Infections | Post Exposure Prophylaxis* |
