Critsila™

Fultrant 250 Injection

Fulvestrant Injection 250mg/5ml

Selective Estrogen Receptor Downregulator

Fulvestrant binds to estrogen receptors and accelerates their degradation, reducing tumor cell proliferation.

Effective in Hormone Receptor Positive Breast Cancer

Indicated for HR-positive, HER2-negative advanced or metastatic breast cancer.

Proven Clinical Efficacy

Reduces risk of disease progression and improves progression-free survival.

Convenient Dosing

Administered as 250mg intramuscular injection for optimal therapeutic benefit.

Well Tolerated

Generally well tolerated with manageable and predictable safety profile.

INDICATIONS

Hormone Receptor (HR+) Breast Cancer	Advanced or Metastatic Breast Cancer	Locally Advanced Breast Cancer	Postmenopausal Women with HR+ Disease
