Critsila™

Hepalogy-25

25000 IU / 5ml

Prevents Blood Clot Formation

Inhibits factor Xa and thrombin, reducing the risk of clot formation.

Improves Blood Circulation

Enhances blood flow and maintains vascular patency.

Reduces Thromboembolic Risk

Minimizes the risk of deep vein thrombosis and pulmonary embolism.

Lowers Lipid Profile

Significantly reduces total cholesterol, LDL and triglycerides.

Well Tolerated

Safe and effective for long-term cardiovascular protection.

INDICATIONS

- **Hepatic Disorders**
- **Thromboembolic Conditions**
- **Pulmonary Embolism**
