ONCOKRIPT™
Oncology Care Medicines

Imafix-100

Tablets

Imatinib I.P. 100mg

Targeted Cancer Therapy

Imatinib is a tyrosine kinase inhibitor that targets specific proteins involved in the growth of cancer cells.[1]

Effective Across Multiple Cancers

Clinically proven in the treatment of CML, GIST, Ph+ ALL, and other hematologic malignancies.[2]

Improves Survival Outcomes

Helps improve progression-free survival and overall survival in responsive patients.[3]

Well Tolerated

Generally well tolerated with a manageable safety profile for long-term use.[4]

Enhances Quality of Life

Helps patients maintain daily activities and improve overall quality of life during treatment.[5]

Indications

- Chronic Myeloid Leukemia (CML)
- Gastrointestinal Stromal Tumors (GIST)
- Philadelphia Chromosome Positive Acute Lymphoblastic Leukemia (Ph+ ALL)
- Hypereosinophilic Syndrome (HES)
- Other Myeloproliferative Disorders
