Critsila™

Merotyle-TZ 1.5gm

Injection

Meropenem 1000mg + Tazobactam 500mg

Broad Spectrum Efficacy

Combines Meropenem's powerful activity against a wide range of Gram-positive and Gram-negative bacteria with Tazobactam's β-lactamase inhibition.[1]

Powerful Synergistic Action

Tazobactam protects Meropenem from enzymatic degradation, enhancing its effectiveness against resistant strains.[2]

Effective Against Resistant Pathogens

Active against ESBL-producing bacteria and other β-lactamase-producing organisms.[3]

Ideal for Severe Infections

Indicated for complicated intra-abdominal, urinary tract, skin & soft tissue, and respiratory tract infections.[4]

Trusted & Reliable

A dependable choice in critical care settings with proven safety and clinical efficacy.[5]

INDICATIONS

Intra-abdominal Infections	Urinary Tract Infections	Respiratory Tract Infections	Skin & Soft Tissue Infections	Septicemia
