Metaniff-HT Cream

Hydroquinone, Tretinoin & Mometasone Furoate Cream

Reduces Hyperpigmentation
Hydroquinone helps lighten dark spots and melasma for a more even skin tone.

Promotes Skin Renewal
Tretinoin accelerates skin cell turnover, improving texture and tone.

Soothes Inflammation
Mometasone provides anti-inflammatory action, reducing redness and irritation.

Improves Skin Clarity
Helps restore healthy, clear and radiant skin.

Prevents Recurrence
Supports long-term improvement and helps prevent dark spots from returning.

INDICATIONS

- Melasma
- Hyperpigmentation
- Uneven Skin Tone
