Critsila™

Mitomule 10
Injection

Mitomycin Injection IP 10mg

Potent Antineoplastic Activity
Alkylating agent with strong cytotoxic activity against a wide range of tumors.[1]

Effective In Solid Tumors
Clinically used in head & neck cancers, gastric cancer and other solid tumors.[2]

Inhibits DNA Synthesis
Cross-links DNA strands and inhibits replication leading to cell death.[3]

For I.V. Use
Lyophilized powder for IV infusion after dilution – single use vial.[4]

Trusted in Oncology
Widely used in combination chemotherapy protocols for better patient outcomes.[5]

Indications

- Gastric Cancer
- Head & Neck Cancer
- Bladder Cancer
- Breast Cancer
- Esophageal Cancer
