Critsila™

Naloxyn
Injection

Naloxone I.P. 400mcg

Rapid Reversal of Opioid Effects
Naloxone rapidly binds to opioid receptors, displacing opioids and reversing life-threatening respiratory depression.[1]

Life-Saving in Overdose
Essential in the management of opioid overdose, helping restore normal respiration and consciousness.[2]

Fast Onset of Action
Works within minutes when administered intravenously or intramuscularly.[3]

Flexible Administration
Suitable for IV or IM use, providing critical support in emergency situations.[4]

Trusted & Reliable
A trusted opioid antagonist used globally in hospitals, ambulances, and emergency care.[5]

Indications

Opioid Overdose	Respiratory Depression	Post-operative Opioid Reversal	Emergency Resuscitation	Drug-induced Coma	Opioid-induced Sedation
