Cadray™ Lifecare

Nebiroll-SA

Tablets

Nebivolol 5mg + S-Amlodipine 2.5mg

Dual Mechanism, Superior Control

Nebivolol reduces heart rate & myocardial oxygen demand while S-Amlodipine causes potent vasodilation for effective BP control[1]

Better BP Reduction

Greater reduction in both systolic and diastolic BP compared to monotherapy[2]

Cardio Protective

Nebivolol offers antioxidant, anti-inflammatory & endothelial protective effects[3]

Well Tolerated

Lower incidence of peripheral edema and reflex tachycardia compared to other CCBs[4]

Once Daily Convenience

Simplifies therapy and improves patient compliance[5]

Safe & Effective Combination

Effective BP control with excellent safety and tolerability profile[6]

Indications

- Hypertension
- Hypertension with Tachycardia
- Stable Angina
- Hypertension with Diabetes
- High Cardiovascular Risk Patients
