Nevired 200
Tablets

Nevirapine Tablets IP 200mg

Effective Antiretroviral
A powerful NNRTI that inhibits HIV-1 reverse transcriptase, reducing viral replication.

Improves Immune Function
Helps increase CD4 cell count and strengthens the immune system.

Delays Disease Progression
Lowers viral load and slows the progression of HIV infection.

Once-Daily Convenience
Once-daily dosing for better patient compliance and consistent outcomes.

Well Tolerated
Generally well tolerated with a proven safety profile in long-term use.

Indications

HIV-1 Infection | Antiretroviral Therapy | Combination Therapy Regimen | Immune System Support
