Respihub™

Ninasis 150

Softge Capsules

Nintedanib 150 mg

SLOWS DISEASE PROGRESSION

Nintedanib helps slow the rate of decline in lung function in patients with IPF.

REDUCES EXACERBATIONS

Significantly reduces the risk of acute exacerbations and disease worsening.

IMPROVES LUNG FUNCTION

Supports stabilization of lung function and helps maintain quality of life.

DUAL PATHWAY INHIBITION

Inhibits key pathways involved in fibrosis progression for effective disease control.

WELL TOLERATED

Generally well tolerated with a manageable safety profile for long-term use.

Indications

- Idiopathic Pulmonary Fibrosis (IPF)
- Chronic Fibrosing Interstitial Lung Diseases
- Progressive Fibrosing ILD
- Disease Progression Reduction
- Lung Function Stabilization
