Critsila™

Packlin 260
Injection

Paclitaxel Injection IP 260mg

Premium Taxane Class Antineoplastic Agent

Potent Antineoplastic Activity
Paclitaxel inhibits cancer cell growth and proliferation by stabilizing microtubules and preventing cell division.

Effective Against Solid Tumors
Indicated in breast, ovarian, lung, head & neck, gastric and other solid tumors.

Intravenous Infusion Use
Administered IV after proper dilution for optimal therapeutic efficacy.

Microtubule Stabilization
Promotes microtubule assembly and inhibits depolymerization, leading to apoptosis of cancer cells.

Trusted & Proven Efficacy
Backed by extensive clinical use and a well-established safety profile.

Composition :-

Paclitaxel	I.P	260mg.
Polyoxyl 35 Castor Oil	I.P	527mg.
Dehydrates Alcohol	I.P	49.7%v/v 30mg.

Indications :-

Breast Cancer | Ovarian Cancer | Lung Cancer | Gastric Cancer | Head & Neck Cancer
