Palbocare 125

Palbociclib Capsules 125 mg

Targeted CDK4/6 Inhibition

Palbociclib is a selective CDK4/6 inhibitor that helps block cancer cell proliferation by arresting the cell cycle in the G1 phase.[1]

Clinically Proven Efficacy

Demonstrated significant improvement in progression-free survival when used in combination with endocrine therapy in HR+/HER2- advanced breast cancer.[2]

Combination Therapy Advantage

Designed to be used with letrozole or fulvestrant, enhancing treatment outcomes in a broad patient population.[3]

Well-Tolerated Profile

Generally well tolerated with a manageable safety profile, allowing patients to maintain quality of life during treatment.[4]

Empowering Cancer Care

Empowering hope and extending survival through innovative targeted therapy for breast cancer patients worldwide.[5]

Composition :-

Palbociclib I.P 125mg.

Indications

HR+ / HER2- Advanced Breast Cancer	Locally Advanced or Metastatic Breast Cancer	In Combination with Endocrine Therapy
