Piobot-M

Tablets

Pioglitazone 15mg + Metformin HCl 500mg

EFFECTIVE GLYCEMIC CONTROL

Combination therapy helps improve blood glucose control in patients with type 2 diabetes mellitus.

DUAL ACTION FORMULA

Pioglitazone improves insulin sensitivity while Metformin reduces hepatic glucose production and increases uptake.

CARDIOMETABOLIC BENEFITS

Helps improve lipid profile and supports cardiovascular risk reduction in diabetic patients.

SUPPORTS WEIGHT MANAGEMENT

Pioglitazone aids in weight stability while Metformin is known to help in weight management.

SAFE & WELL TOLERATED

Sustained-release formulation for better tolerability and once-daily convenience improving patient adherence.

Indications

- Type 2 Diabetes Mellitus
- Insulin Resistance
- Cardiometabolic Risk Reduction
- Weight Management
- Dyslipidemia Associated with Diabetes
