Critsila™

Potfil

Injection

Potassium Chloride Injection IP 1500mg/ml

Essential Electrolyte for Critical Care Support

Essential Electrolyte Replacement

Potassium is vital for maintaining normal cell function, fluid balance and acid-base equilibrium.

Supports Nerve & Muscle Function

Helps in the proper functioning of nerves and muscles, including the heart muscle.

Cardiac Support

Maintains normal cardiac rhythm and helps prevent arrhythmias associated with potassium imbalance.

For IV or IM Use

Suitable for intravenous or intramuscular administration as directed by the physician.

Critical Care Essential

Indicated in the management of hypokalaemia and during fluid and electrolyte therapy.

Composition :-

Potassium Chloride	I.P	1500mg/ml.

Indications :-

- Hypokalaemia
- Cardiac Arrhythmias
- Metabolic Alkalosis
- Fluid & Electrolyte Imbalance
- Postoperative Care
