Cafoli™
LIFECARE

Ribziff™-40 DSR
Capsules

Rabeprazole 40mg (EC) + Domperidone 30mg (SR)

Dual Mechanism for Maximum Relief
Combines a proton pump inhibitor with a prokinetic agent to reduce acid and improve gastric motility.

Effective Acid Suppression
Rabeprazole provides potent and long-lasting suppression of gastric acid secretion.

Enhances Gastric Motility
Domperidone improves gastric emptying and helps relieve symptoms of bloating and discomfort.

Relieves GERD Symptoms
Effectively reduces heartburn, regurgitation and associated discomfort.

Sustained & Prolonged Action
EC + SR formulation ensures extended relief and improved patient compliance.

Well Tolerated & Safe
Proven safety profile for long-term use with minimal side effects.

Indications

GERD | Gastritis | Peptic Ulcer | Dyspepsia | Delayed Gastric Emptying
