XUROGEN™

Sarogit 4

Tablets

Saroglitazar 4mg

Indications

- Type 2 Diabetes Mellitus
- Non-Alcoholic Fatty Liver Disease (NAFLD)
- Dyslipidemia / Hypertriglyceridemia
- Metabolic Syndrome

Dual PPAR α/γ Agonist

Saroglitazar acts on both PPAR α and PPAR γ receptors for comprehensive metabolic benefits.

Improves Lipid Profile

Effectively reduces triglycerides, VLDL-C and increases HDL-C for a healthier lipid balance.

Glycemic Control

Helps in improving insulin sensitivity and glycemic control in type 2 diabetes.

Non-Alcoholic Fatty Liver Disease (NAFLD)

Reduces liver fat and improves liver function parameters in NAFLD patients.

Cardiometabolic Protection

Provides cardiometabolic benefits by improving multiple risk factors.

Well Tolerated

Generally well tolerated with a favorable safety and tolerability profile.
